Windows

EXPERIENCE

Lead Developer | Oct 2013 - Present
Pomegranate Lab

Responsible for managing and implementing back-end and front-end code for webapps designed to help teachers better connect with their students. Communicate remotely with designers to ensure production code looks and functions as designed.

Lead Developer | Dec 2012 - Present
Marie Antoinette's Gluten-Free Bake Shoppe

Rebuilt front-end and back-end of company website to include online vendor ordering system and custom CMS. Collaborate with owner, designer, and seller to define online business strategy.

C.T.O. & Co-Founder | Dec 2012 - Jan 2014
Normandy Labs, LLC.

Wrote, designed, and self published Android applications to the Google Play market. Developed contract Android applications to be used only by the contracted company.

C.T.O. & Co-Founder | Apr 2013 - Aug 2013
Sisasa, Inc.

Led development team and created a prototype mobile banking application for Android while attending the GIGTANK Start-Up Incubator. Worked with the design and marketing teams to define business strategy and requirements.

Software Developer | June 2010 - Aug 2012
Ford Motor Company

Designed and developed tools and frameworks to test and develop car connected Android applications. Worked with other developers to ensure tools and frameworks followed car system and security industry standards.

EDUCATION

University of Michigan Dearborn
B.S. in Computer and Information Science | 2010
